

## Looks Like a Work of Art — Works Like a Dream!

The Elite 9000 is A&E's easiest to operate and most preferred manual awning. The soft, cool, elegant and luxurious woven acrylic designer fabric "breathes" so it dries quickly and is 22% cooler than vinyl.

Exclusive patented Shadow™ Pattern hues are woven in and fade resistant for long lasting beauty. All-metal satin or white weathershield provides maximum canopy protection.

## Classic Luxury — The Finest Awning Made

The rich, fade-proof hues of this premium woven acrylic fabric are equally beautiful on both sides. Its pores allow air to escape for a soft, translucent shade that is 22% cooler than vinyl, and fast drying. This is the overall best performing and best looking awning canopy fabric available. A&E's patented roll formed roller tube only requires a center support on awnings 22 feet or longer. With super-tough protective coating, it outperforms all conventional roller tubes for strength and weather resistance. The exclusive anti-slack rafter pivot mechanism keeps the awning fabric tensioned when changing the arms between pivot and carport positions — no need to adjust or retension. To make operation smooth and easy on the hands, vinyl cushioned lift handles and ergonomically designed "soft-touch" lock knobs are standard. The patented PermaLoop™ pull strap keeps the loop open for easier wand engagement. The Elite 9000 is built with A&E Universal Hardware. Good looking yet rugged and dependable, it's easy to operate and fits virtually any RV.

## Exclusive Shadow™ Color Pattern

*The color in this chart should be used as a guide only. For exact fabric color, see A&E's fabric sample kits.*

## Beautiful, All-Metal Weathershield

Elite 9000's satin anodized or painted aluminum wraparound weathershield is a series of precisely hinged extrusions that roll into a sleek canopy case and provide maximum fabric protection.

*Canopy case protects the fabric.*

**Important: Refer to product manual for proper installation and operation.**
